

## Address Translation Tool

A web application that translates addresses between English, Traditional Chinese, and Simplified Chinese, using Google APIs.

### Use of Google API key

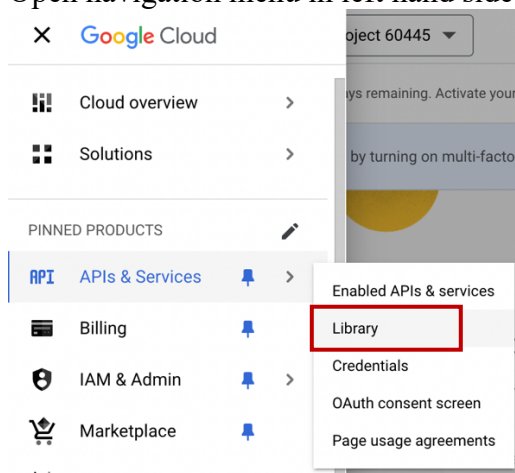

API	Usage
Geocoding API	Search the address using Google Map and return the result in assigned language
Cloud Translation API	Translate address into assigned language

### How to get API key

1. Go to Google Console
2. Create a new project

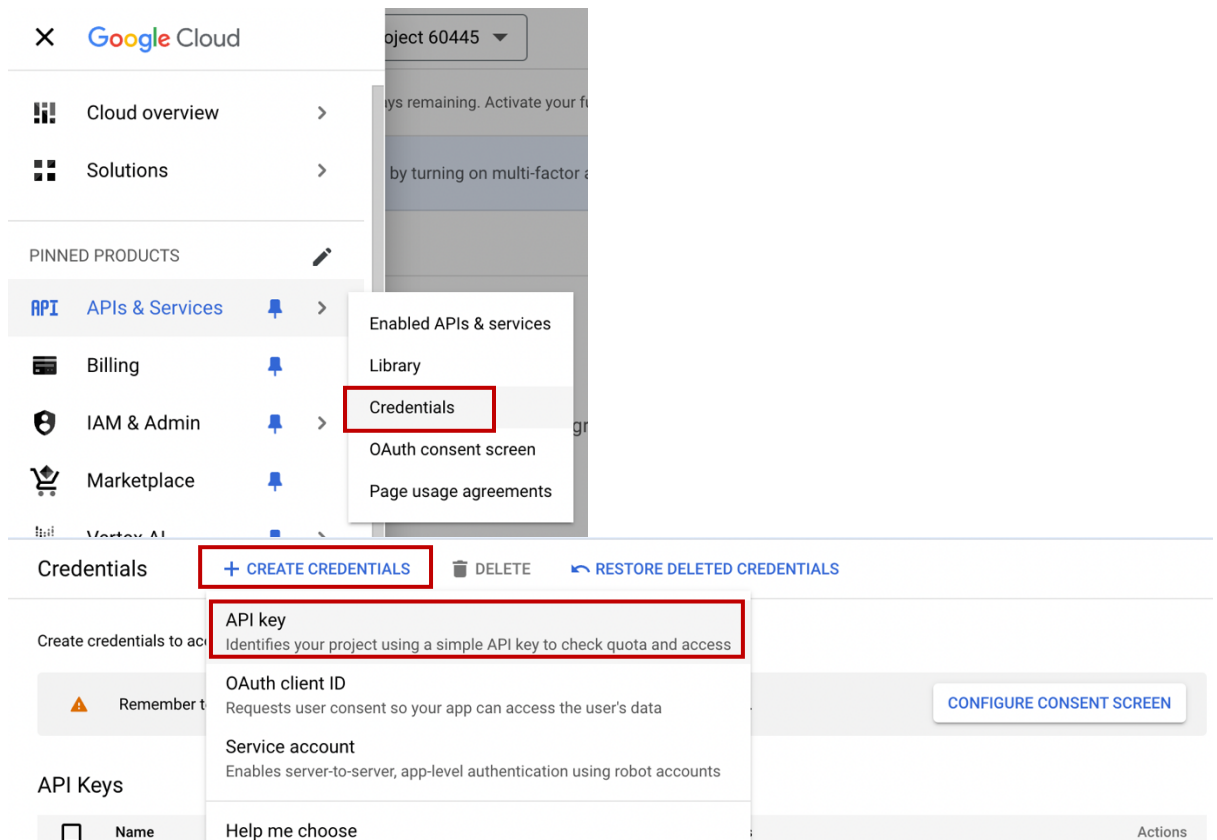

3. Open navigation menu in left hand side → APIs & Services → Enable APIs & services

4. Search 'Geocoding API' and 'Cloud Translation API'
5. Click 'Enable'

6. Go to Credentials and create

A new API key will be displayed.

7. Restrict the API key

Click in the corresponding API key → Restrict Key → Restrict Usage to APIs →

select corresponding API

Click save to apply restriction

**API restrictions**

API restrictions specify the enabled APIs that this key can call

- ☐ Don't restrict key  
This key can call any API
- ☒ Restrict key

1 API

**Selected APIs:**

Cloud Translation API

## 8. Copy the API keys to HTML code

Restrictions	Actions
Cloud Translation API ...	<a href="#">SHOW KEY</a> ⋮
Geocoding API ...	<a href="#">SHOW KEY</a> ⋮

```
const geocodingApiKey = "Replace with Geocoding API key"; // Replace with Geocoding API key
const translationApiKey = "Replace with Translation API key"; // Replace with Translation API key
```

## Pricing and Quota for API keys

### Translation API

## **Improvement**

To achieve more accurate translation result, some changes are suggested to be added to input format.

- Separate block, floor and flat from the input and do translation separately
  - “香港薄扶林置富花園富逸苑 13 樓 A 室” → “香港薄扶林置富花園富逸苑” & “13 樓 A 室”
    - Ask user to use ‘ ’ to separate during input.
    - Create rules to detect the separation from each address. (patterns varies in different region)
    - Create 2 input boxes, 1) region and building 2) floor and flat
  - Geocode “香港薄扶林置富花園富逸苑” into English address.
    - “Chi Fu Fa Yuen Fu Yat Yuen, 6 Chi Fu Rd, Pok Fu Lam, Hong Kong”
  - Translate “13 樓 A 室” into English.
    - “Room A, 13th Floor”
  - Merge the two results as output.
    - “Room A, 13th Floor” + “Chi Fu Fa Yuen Fu Yat Yuen, 6 Chi Fu Rd, Pok Fu Lam, Hong Kong”
